

VERMONT WEEKLY INFLUENZA SURVEILLANCE REPORT

April 16 – April 22, 2017 | MMWR Week 16

KEY POINTS

Influenza activity was categorized as **sporadic** for MMWR Week 16

- Levels of Influenza-like Illness (ILI) activity seen in emergency departments remained the same
 - Of the total emergency room visits, **2.6% were due to ILI**
- Sentinel providers reported **1.1% of patients had ILI**
- Vermont Department of Health Laboratory reported **12 positive flu tests**
- National Respiratory and Enteric Virus Surveillance System reported **36 positive flu tests**

FLU SURVEILLANCE SEASON

START
MMWR Week 40
(Week End Date 10/08/16)

END
MMWR Week 20
(Week End Date 5/20/17)

Syndromic Surveillance of Influenza-Like Illness (ILI) at Vermont Hospitals, 2016-2017 vs. Historic Data

Sentinel Provider Data From ILINET

Sentinel providers report the number of patients with an ILI seen by their practices each week

ILI is defined as a fever of at least 100° F and cough and/or sore throat, without a known cause other than influenza

There are 13 medical practices located throughout the state currently partnering with the Health Department as sentinels

Percent of Visits Reported by Vermont Sentinel Providers* with Influenza-like Illness by MMWR Week, 2013/14 – 2016/17 Flu Seasons

Percent of Visits Reported by Vermont Sentinel Providers* with Influenza-like Illness by Age Group by MMWR Week, 2013/14 – 2016/17 Flu Seasons

Percent of Visits Reported by Vermont Sentinel Providers* with Influenza-like Illness by Age Group by MMWR Week 2016/2017 Flu Season

Vermont Department of Health Laboratory (VDHL) and National Respiratory and Enteric Virus Surveillance System (NREVSS)

Individual influenza laboratory results are not reported to the Vermont Department of Health. The data below represents an unknown subset of the actual number of flu tests done in Vermont

VDHL tests specimens for flu to identify exactly which strains are currently causing illnesses in the state. Flu testing at the state laboratory is for surveillance purposes and completed on specimens submitted to VDHL

NREVSS data is collected from collaborating university and community hospital laboratories. These participating laboratories report positive results for a number of viruses, including influenza, on a weekly basis. Three Vermont hospitals contribute data into this system and is voluntary
